Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2 ,8,9,17 and 19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sorkin. In the Sorkin patent head means 24 is pivotable via pivot point 28 in movement. As per claim 2 the movement is limited to two axes of movement.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-7,10-13,15,16,20-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sorkin in view of Roth.

Sorkin teaches the claimed subject matter except for the movement parameters and the ratchet connection of the head and torch body. Roth is applied for showing in figure 6 means for indexing and adjusting the movement of a torch head in a pivotable way to the torch carriage. Use of the same leads to a more controllable cutting torch and in view of this teaching it would have been obvious to modify the torch of Sorkin to use a pivot controller as in Roth, such that more controllable and versatile cutting could occur. Note indexing means 3 in figure 6. As per claim 10 it is considered a matter of

Art Unit: 3742

design choice that would have been obvious to the artisan , to effect the head movement via a ratchet means in lieu of the means set forth in Sorkin or Roth. Use of a ratchet is common for movement and is just one of many types of movement means available and known to the artisan. As per claim 16 use of an end cap is an obvious choice , such structure being common in torch systems. As per claim 18 the means 3 in Roth provides for predetermined reference points of movement.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fornsel, Henderson, Klingel and Gwin et al are cited for disclosing plasma torches of interest having head movement systems.
